

LED Vapor Tight

ELYVT-42N

Visual Color Temp.

SINGLE TUBE STRIP LIGHT

Energetic Lighting's LED vapor tight fixtures emulate the look and feel of traditional linear fluorescent vapor tight fixtures, common to parking lot garages and commercial spaces that are regularly exposed to water and humidity. Installing these will not only save on energy costs, but eliminate maintenance costs since there is no need to change out any more burnt out fluorescent tubes.

FEATURES

- Wide area lighting beam angle.
 - Long life, last up to 50,000 hours.
 - No UV or IR radiation.
 - Mercury-free construction.
- Completely sealed lens and housing for wet location installation.
